AI Growth & Automation Associate - WFH

Dear Candidate,

Thank you for your interest in the **AI Growth & Automation Associate – Work From Home** position.

Before proceeding to the next stage, please read our full job description carefully:

Job Description: https://www.naukri.com/job-listings-221026000604

Kindly note that the salary, working days, and start time specified in the job description are fixed and non-negotiable. We appreciate your understanding.

Please proceed only if you have read the job description and meet all the mandatory requirements.

Task 1: AI Skills & Prompt Engineering Assessment

As part of our selection process for the **AI Growth & Automation Associate** position, we invite you to complete the practical task below.

This assessment is designed to evaluate your ability to use AI tools effectively, develop well-structured prompts, solve problems creatively, and turn ideas into practical solutions.

Your Challenge:

Using AI tools of your choice, create **ONE** project in the **Healthcare or Technology** domain. Choose any **ONE** of the following areas:

- **Website Development:** Build a website or a functional web application.
- **Digital Marketing:** Create an AI-powered marketing campaign, content strategy, or digital marketing solution.
- **Web Scraping & Data Intelligence:** Collect and organise publicly available information, such as a list of General Practitioners in Australia and their publicly listed practice contact details.
- **Automation:** Develop an AI-powered workflow or automation solution that improves efficiency or solves a real-world problem.
- **Innovation & New Ideas:** Identify a problem in healthcare or technology and develop an innovative AI-powered solution or working prototype.

You are encouraged to think creatively, experiment with different AI tools, and demonstrate your ability to turn an idea into a practical outcome.

Important requirements:

- AI tools must play a meaningful role in developing your project.
- Your project must be related to healthcare or technology.
- Focus on demonstrating your skills, creativity, problem-solving ability, and effective use of AI rather than simply presenting an idea.
- You may use any AI tools, programming languages, frameworks, or supporting technologies of your choice.

Submission Requirements

Please submit all three of the following:

1. Video Presentation — Minimum 2 Minutes

Record a short video explaining your project and your approach. Please cover:

- **AI Tools:** Which AI tools did you use, and why did you choose them?
- **Prompt Engineering:** How did you design, refine, and improve your prompts to achieve the desired results?
- **Your Approach:** How did you approach the task, and did any previous experience or knowledge influence your decisions?
- **Challenges & Problem-Solving:** What challenges did you encounter, and how did you overcome them?
- **Final Outcome:** Demonstrate your project and explain what it achieves.

2. Prompt Documentation

Provide a document containing **all the prompts you used** to develop your project. Include any significant prompt revisions or follow-up prompts that helped improve the results. This will help us understand your thought process and how effectively you interact with AI tools.

3. Project Link

Share a link through which we can access and review your completed work. Examples include:

- GitHub repository
- Live website or web application
- Google Drive folder containing your project files
- Working automation or prototype demonstration

Please ensure the link is accessible to our assessment team. If your project cannot be hosted online, provide the necessary files and instructions to review or run it.

What We Evaluate

We are interested in how you think, experiment, and build — not just the final presentation.

Your submission will be assessed on:

- Practical use of AI tools
- Prompt engineering skills and iterative improvement
- Creativity and innovation
- Problem-solving and technical execution
- Quality and usefulness of the final outcome
- Ability to explain your decisions and demonstrate what you have built

Our expectation: Don't just tell us what AI can do. Show us what you can create with it. We look forward to seeing your ideas, creativity, and practical skills in action.

Once completed, please email your submission to jobs@gokulinfocare.com

We operate on a first-come, first-served basis, and there is no set deadline for this task.

Those who complete the task first and with the best quality will move on to the next stage.

If you have any questions, feel free to email us.

If the attachment is too large for email, please upload it to Google Drive and send us the access link. Ensure the link is set to allow access to anyone, and double-check that it's accessible before sharing it with us.

WE WISH YOU GOOD LUCK AND ALL THE BEST
